

QACS International Private Limited

Customer communication for ISO 37001:2025

To,

All certified and applicant client.

Dear sir/Madam,

You might be aware that Standard ISO 37001-2016 has been revised and new Standard ISO 37001:2025 has been launched.

The validity of current standard ISO 37001:2016 will end on 28 February 2027 and all certificates issued as per ISO 37001:2016 will become invalid.

To facilitate our client QACS will start transition to ISO 37001:2025 as part of surveillance or recertification audit from 1 march 2026.

But note after 28th August 2026 no recertification audit would be conducted in old version i.e. ISO 37001:2016.

Guidance for transition:

Clients need to identify gap in current system as per new standard, rectify/ revise the documentation as required. Implement the revised changes and conduct Internal audit and MRM as per revised requirements.

Note: If Transition is not done as per planned surveillance/recertification between 1 march 2026 to 28 February 2027 then special audit would be needed which will be chargeable.

Thanking you

For QACS International Pvt. Ltd.
